

Imports and Wholesale Logistics

Our Logistics division supports our mission by purchasing in bulk and arranging transport for a variety of materials needed by the small businesses we support. We are currently focused on supporting small businesses, entrepreneurs, Cottage Food Operators, and Contractors in Southern California. Our parent company, however, V.C.Scozi, is purchasing real estate located in opportunity zones near strategic interstates and ports nationwide and we will evaluate any opportunity that helps us expand our Logistics operations to Imports, Intermodal transport, and Exports for small businesses across the country.

Our Current Niche is sourcing hard to find, premium products and selling them to businesses and customers at a lower price than any other American supplier. In addition to our suppliers in the Baltic nations of Sweden, Finland, Lithuania, Poland and Germany, we have also imported products from India and China. We routinely receive air cargo from Los Angeles Airport, and have picked up quantities as large as High Cube 40' containers from the Los Angeles/Long Beach ports. Whatever you need, in whatever quantities you need it, we can help you find the lowest cost supplier, determine its customs tax rate and avoid anti-dumping penalties, and deliver it to your door if it is cheaper for us to arrange logistics than other American suppliers.

We have in Stock a wide variety of products that we purchased in bulk quantity and have available for immediate delivery, including:

Candles. In partnership with Corona branding company C4Effects, we can supply candlemakers, wedding venues, and other small merchants with clear or etched candle jars with wood lids, Soy Wax, Organic Soy Wax, or Gel Wax, and custom labeled and packaged candles for wedding favors or other uses. We have thousands of candles or candle jars and large quantities of wax, fragrance, and wicks in stock to serve customers or companies of any size, and can source more according to customers needs.

Steel. In partnership with Menifee startup Infinity Fabworks, we can supply a variety of steel products which we can deliver immediately throughout Southern California or custom fabricate to meet your solution. In keeping with our mission to support small businesses providing sustainable food and shelter, we are currently focused on providing construction materials for food truck and cart fabricators and tiny home fabricators, including 2" steel structural insulated panels and 18 gauge 304 Stainless Steel sheets to meet stringent Southern California food truck fabrication and building code requirements.

Berries. In support of Swedish Falls Cottage Food Operations and other [Cottage Food Operators](#) in Riverside County, we can supply a variety of nutrient packed berries and berry powders and blends to use in baking, smoothies, fruit jerky, trail mixes, and other products. We currently have largest quantities of Organic [Seaberry](#) and Organic [Black Currant](#) Powders from berries grown in North Europe and Asia, and Organic [Acai](#) and Organic [Maqui Berry](#) Powders from South America.

Tea. Vikings began importing fragrant Indian spices like Cardamom to Sweden in the 9th century, and Swedish chefs have perfected the blending of these flavors and spices with Scandinavian fruits and flowers for over a millennia. Our Swedish suppliers blend White, Black, Green, Rooibos, and Honeybush teas from Sri Lanka, India, China, and South Africa with fruits, flowers, and spices grown in Sweden or imported from around the world. In response to overwhelming demand, we have opened [The Doft Loft](#) in our Corona Marketplace for anyone to come smell or taste our fragrant teas and candle fragrances any Tuesday-Saturday from 10am to 5pm. You can also e-mail us to be notified of special events with free Nordic food samples and activities. For more information about any of our current stock please e-mail sales.swedishfalls@gmail.com.
